

Contribution Statement

Team: Team1

Topic: Topic 4 — Async Research Assistant

Repository: <https://github.com/Nurana100/team1-ai-eng-research-assistant>

Final tag: v1.0-final

Submission date: 2026-09-19

How this was filled in

Commit percentages were calculated from `git shortlog -sn` on the main branch, merging duplicate author identities (same person committing under different git configs). PR ownership and review lists were compiled from the repository's pull request history. Exact percentages and any missing PR numbers should be verified and corrected by each member before signing.

Member — Nurana Aliyeva (@Nurana100)

Owned (sole author of these files / PRs):

- `src/services/ai_service.py` — initial skeleton and full retry/timeout/logging/caching wrapper
- `src/core/researcher.py` — orchestration, concurrency, graceful degradation; fixed Wikipedia/arXiv header and redirect bugs
- `docs/architecture.md` — full module map and design rationale
- `README.md` — project-specific README
- `scripts/run_demo.py` — Wikipedia keyword fallback for phrasing-sensitive demo questions
- `src/config.py` — automatic `.env` loading fix
- `tests/test_config.py` — fixes isolating tests from local `.env` state
- PRs: #4, #5, #8, #17, #26, #28, #29, #32, #34

Co-owned (paired or substantially edited):

- `src/cli.py` — `dotenv` loading fix, alongside CLI skeleton and validation from other members
- `.env.example` — updated default provider to Gemini free tier

Reviewed (PRs reviewed and merged):

- PRs: #7, #20, #24, #30, #33

Approximate share of commits: 29.2%

Member — Elshan Shukurov (@elsensukurov)

Owned (sole author of these files / PRs):

- `src/storage/repository.py` — StorageBackend ABC and SQLiteStorage implementation
- `tests/test_storage.py`
- `tests/conftest.py` — StubAIService, StubLLM, StubWebSearch, offline httpx client factory, sample Source fixtures
- `src/config.py` — `extra="ignore"` fix for undeclared env keys
- PRs: #15, #16, #24

Reviewed (PRs reviewed and merged):

- PRs: #12, #13, #14, #15, #16, #24

Approximate share of commits: 26.4%

Member — Əli Həsənlı (@ali-hasanlı)

Owned (sole author of these files / PRs):

- src/cli.py — initial skeleton, async research querying enhancement
- src/services/cache.py — TTLCache and its wiring into AIService
- tests/test_researcher.py — happy path, graceful degradation, all-sources-fail, concurrency test
- Dockerfile, .dockerignore, requirements.txt, scripts/run_demo.py — initial versions
- --no-cache flag wiring through AIService / researcher.py / cli.py; researcher/__main__.py entrypoint
- PRs: #6, #11, #20, #23, #25, #30, #31

Reviewed (PRs reviewed and merged):

- PRs: #6, #11, #20, #23, #25, #30

Approximate share of commits: 26.4%

Member — Gasham Huseynli (@gashamhuseynli)

Owned (sole author of these files / PRs):

- src/services/rate_limiter.py — per-source async RateLimiter
- src/cli.py — input validation (empty / oversized / invalid-source checks)
- mypy_report.txt, docs/security_check.md
- tests/test_config.py, tests/test_cli.py — initial versions
- artefacts/ folder, benchmark table in README
- Wired SQLiteStorage into researcher.py / cli.py so real queries persist
- PRs: #21, #22, #27, #32, #33

Reviewed (PRs reviewed and merged):

- PRs: #9, #18, #19, #21, #22, #27, #33

Approximate share of commits: 18.1%

Note: percentages above must add to 100% and approximately match git shortlog -sn on main.

AI tool disclosure

We used Claude (Anthropic) as an AI coding assistant throughout development, as follows:

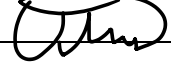

Module / file	Assistant	What we did with it
src/services/ai_service.py	Claude	Drafted the retry/timeout/logging/caching wrapper structure; team reviewed and wired it into researcher.py.
src/storage/repository.py	Claude	Drafted the StorageBackend ABC and SQLiteStorage; team member found and fixed real bugs (connection leaks, missing parent directory, lastrowid type issue) as separate documented commits.
Dockerfile, .dockerignore, requirements.txt	Claude	Drafted initial structure; team inspected, built, tested, and iterated until the 5-question demo ran cleanly inside the container.

tests/conftest.py and various test files	Claude	Suggested test scaffolding and cases; team reviewed, adapted to actual code signatures, and wrote additional tests.
scripts/run_demo.py	Claude	Helped debug live-API failures (Wikipedia phrasing sensitivity, .env loading) and iterate on a working fallback strategy for the 5 required demo questions.
README.md, docs/architecture.md	Claude	Drafted initial structure and content; team reviewed and confirmed accuracy against the actual codebase.

We affirm that we can defend every line of code in this repository during the oral defense. “The AI wrote it” is not an answer we will use.

Signatures

By signing below, we affirm that: the contributions described above are accurate; the commit percentages reflect actual work, not artificially split commits; every line of code in the repository can be defended by at least one team member; AI assistant usage has been disclosed as described above.
